

# Comunica's tough EN966 CE safety helmet.

## BETA+

Comunica has developed the **BETA+** from their classic **BETA** helmet. Without losing any of the wonderful lightness, comfort and neat small size of the original and providing much higher head protection than EN397 Industrial Safety Helmets. It protects against all-round impacts (at DOUBLE the level of the USAF fast jet helmets!), so is ideal for use in Microlight/ Ultralights as well as in Paragliding and Paramotoring. Since its introduction the **BETA+** has also been utilised in moving vehicles, boats etc and where wearers may fall or be struck by moving objects.

**BETA+** can be worn with any of our comms headsets or just ear defenders. It is also designed to work with our **FLIP+** headsets, Ideal for instructors. The **FLIP+** headset is attached to the **BETA+** helmet and can be easily lifted away from the ear or can be rotated out of the way altogether for off intercom conversation.

The tough OPTIONAL **VIS+** full face visor provides eye and face protection and microphone quiet with clear all-round vision.

- EN966 high protection level (DOUBLE even the USAF fast jet helmets!)
- PERFECT helmet protection over your headset...
- OPTIONAL ultra-safe visor lifts up out of the way and out of sight with adjustable friction
- LIGHT, COMPACT and COMFORTABLE...
- PERFECT upward vision and the visor reaches to below the chin for quiet warmth
- PERFECT head protection all-in one with your **FLIP+** headset. Ideal if you need to listen or talk to others around you...

overleaf you'll find more details.....

# FLIP+ HEADSETS & BETA+ HELMETS for on-body radios

The Ultralight BETA+ is the perfect companion to Comunica's solo headsets. BETA+'s excellent head freedom and upward vision combined with Comunica's SOLO headset features make these the ideal choice for Paramotor, Paragliding or any other pursuit where solo comms and head protection is essential.

## Solo headset features:

- special noise reduction mics...
- maximum ambient noise cut off...
- connect perfectly to Yaesu & Icom radio's... (also to other radio's on request.)
- LHS and RHS earphones can both have
- Radio PTT buttons... (use whichever hand is free...)
- OPTIONAL belt/hand PTT upon request.
- Available as FLIP+ headsets to attach to your BETA+... (or as our standard folding type headsets if you prefer.)

For more info on Comunica-Aviation Solo Headsets please contact us.

## In summary, BETA+ gives you:

### - LIGHTNESS:

No more tired, sore necks, as, with our hi-tech composite manufacture:

- BETA+ weighs a featherlight 550gms! Just 750gms with our featherlight VIS+

- OTHER EN966 HELMETS WEIGH A HEAVY 1050gms, 50% more...

### - OUTLINE SIZE:

You get the easiest possible access to structure around you because BETA+ is much neater and smaller overall than other EN966 helmets.

### - VISORS:

We make these ourselves now, so they can now be IDEAL for flying:

- They give PERFECT UPWARD VIEW, having no "peak" in the way.
- Their wide double curvature gives superb wrinkle-free view ALL ROUND.
- They reach really low down on the chin for quiet and warmth.
- They lift up high, completely out of landing view.
- Their holding friction is easily adjusted and they do not

"snap up" in wind.

- They stay put safely, UP or DOWN, at all speeds, in all flight.
- In accidents they "break-away" safely if caught on moving objects,
- AS REQUIRED BY THE EUROPEAN PPE SAFETY DIRECTIVE
- They are available CLEAR, TINTED
- They are less expensive to replace....

### - CHIN STRAP FASTENERS:

We have had specially convenient, safe, ones made that meet EN966 fully and are easily connected and disconnected.

### - HEADSETS for BETA+:

These are any of Comunica's neat "fold-up" style or the FLIP+ style which attach directly to BETA+'s neatly moulded mounting points.

Including models with Active Noise Reduction electronics and batteries in their headbands.

We make headsets for ALL RADIOS and INTERCOM systems, to use in ALL ENVIRONMENTS,

### -BETA+ COLOURS & SIZES

BETA+'s are our available in 2 colours 'Pearlised White' or 'Carbon Optic' and come in a broad range of sizes. PADFIT+ our modular fitting pads mean you will always have the most comfortable fit.
