

COMUNICA-AVIATION HELMET SIZING GUIDE

Hold a cloth tape-measure over the eyebrows and get a friend to measure round your head at the widest point.

Note this measurement. It is your Euro head size that you should let us know.

If you think you have an exceptionally 'long' or 'wide' head, please tell us Your perfect helmet size may be a size larger with side or front fitting pads.

Alternatively, you can ask for e.g a 62cm 'XL' helmet and a fitting pad set. This lets you fit your passenger or pupil whatever headsize is needed.

PLEASE SEE THE BELOW DIAGRAM FOR SUGGESTED PAD FITTINGS.

The 3-pad set we supply is called **PAD+**. The fitting pads can either be slid under the inner lining of the helmet at the front and back or fastened with the velcro fasteners provided With 3 pads it is possible to reduce the helmet size by upto 3 Euro head sizes. We can also supply the pads individually at your request.

Top Pad: **PAD/CIRC**

Front/Back Pad: **PAD/BANA**

For 62cms no pads are needed and the pad fits below are suggested for fitting smaller heads

For 60cms head, fit 1 pad

For 58cms head, fit 2 pads

For 56cms head, fit 3 pads

For 54cms head, fit 4 pads
